Intersections of Identity

The artists featured in *Gender Euphoria* explore the intersections between their racial and cultural identities and gender expression. The artworks and programming spark and

Thank you to every person who visited This IS Kalapuyan Land, engaged with us on social media, and told their friends and colleagues about the exhibition. As the inaugural exhibition of our guest curator program to decentralize the museum authority over history and art, we could not have predicted how much public support there would be for this work.

This IS Kalapuyan Land will live on in perpetuity, until it too becomes outdated and necessary to retool into a new iteration once again!

Thank you, Museum Members <3
